

On-shore power becomes mandatory in the Port of Duisburg

From 1 June 2026, the use of on-shore power will be mandatory throughout the entire port area.

Switch now!

Find more information at
www.swdu.de/landstrom

Why on-shore power?

- Avoids the use of diesel generators while at berth
- Significantly reduces noise and odour emissions
- Reliable and clean energy supply
- Contributes to achieving EU climate targets

Around 70 charging points are already available in the Meiderich / Ruhrort port area.

Questions about on-shore power?

Charging with on-shore power – how it works

We offer two options: easily with the CUSTOMERCARD or flexible ad-hoc payment. Both options provide transparent pricing and clean energy – simple, safe and environmentally friendly.

Option 1: Charging with the CUSTOMERCARD

- Apply for the CUSTOMERCARD free of charge at www.swdu.de/landstrom
- Receive the card by post
- Plug in the connector → hold the card to the RFID reader → charging starts
- To stop charging: hold the card again and unplug

Option 2: Charging without registration (credit card)

- Plug in the connector
- Scan the QR code on the charging station
- Complete payment by credit card
- Only the consumed kWh will be charged

Your benefit – today and in the future

With shore power, you secure clean energy and actively contribute to climate and environmental protection.
